POWDER TECHNOLOGY

Subject Index of Volume 89

Agglomeration
fluidization of cryogels in a conical column, 179
the mechanism of defluidization of iron particles in a fluidized bed, 231
Alumina
the internal form of compacted ceramic components: a comparison of a finite element modelling with experiment, 239
Angle of tilt
the tilting fluidized bed: a re-examination, 29
Anisotropy
measurement of anisotropic behavior of dry cohesive and cohesionless powders using a cubical triaxial tester, 197
Attrition
attrition and changes in particle size distribution of lime sorbents in a circulating fluidized bed absorber, 1

Bed behaviour
the tilting fluidized bed: a re-examination, 29
Bed density
quasi-static compaction of porous propellant beds. II. Experiments and application of lattice compaction model to cannon propellants, 219
Bed displacement
quasi-static compaction of porous propellant beds. II. Experiments and application of lattice compaction model to cannon propellants, 219
Beer–Lambert equation
on-line estimation of solids concentrations and mean particle size using a turbidimetry method, 157
Bimodal system
modelling of packing behaviour of irregularly shaped particles dispersed in a polymer matrix, 115
Binary particle mixtures
fluidization of cryogels in a conical column, 179

Char
simulation of secondary fragmentation during fluidized bed combustion of char particles, 71
Circulating fluidization
attrition and changes in particle size distribution of lime sorbents in a circulating fluidized bed absorber, 1
Circulating fluidized bed riser
a predictive hydrodynamic model for circulating fluidized bed risers, 57
Circulating fluidized beds
the volume-average voidage in the riser of a circulating fluidized bed, 79
Cohesion
the mechanism of defluidization of iron particles in a fluidized bed, 231
Cohesionless powders
measurement of anisotropic behavior of dry cohesive and cohesionless powders using a cubical triaxial tester, 197

Elsevier Science S.A.

Cohesive powders
measurement of anisotropic behavior of dry cohesive and cohesionless powders using a cubical triaxial tester, 197
Comminution
novel gas fluidized bed stirred media mill: design and performance of a prototype, 37
Compaction
quasi-static compaction of porous propellant beds. I. Modeling ball powder experiments with deformed spheres in a regular lattice, 209
the internal form of compacted ceramic components: a comparison of a finite element modelling with experiment, 239
Condensing vapor jets
gas jets in fluidized media, turbulent diffusion flames, and condensing vapor jets in liquids, 187
Conical fluidized beds
fluidization of cryogels in a conical column, 179
Contact angle
change in surface properties of solids caused by grinding, 129
Core–annulus flow structure
a predictive hydrodynamic model for circulating fluidized bed risers, 57
Cryogels
fluidization of cryogels in a conical column, 179

Defluidization
effect of inclination on liquid–solid fluidized beds, 101
the mechanism of defluidization of iron particles in a fluidized bed, 231
Deposition methods
measurement of anisotropic behavior of dry cohesive and cohesionless powders using a cubical triaxial tester, 197
Design
novel gas fluidized bed stirred media mill: design and performance of a prototype, 37
Dimensionless analysis
gas jets in fluidized media, turbulent diffusion flames, and condensing vapor jets in liquids, 187

Efficiency
novel gas fluidized bed stirred media mill: design and performance of a prototype, 37
Elasto–plasticity
the internal form of compacted ceramic components: a comparison of a finite element modelling with experiment, 239
Energy dissipation rate
a rate dependent model for turbulent flows of dilute and dense two phase solid–liquid mixtures, 45

Fiber optic sensor
analysis of a mixture of powders in gaseous fluidization by the method of defluidization and by fiber optic sensor, 139
Finite element modelling
the internal form of compacted ceramic components: a comparison of a finite element modelling with experiment, 239

Fluidized bed combustion
simulation of secondary fragmentation during fluidized bed combustion of char particles, 71
Fluidized beds
novel gas fluidized bed stirred media mill: design and performance of a prototype, 37
analysis of a mixture of powders in gaseous fluidization by the method of defluidization and by fiber optic sensor, 139
Fluidized media jets
gas jets in fluidized media, turbulent diffusion flames, and condensing vapor jets in liquids, 187
Friction
pipeline friction losses of coarse sand slurries. Comparison with a design model, 9
slurry pipeline friction losses for coarse and high density industrial products, 19

Gas
novel gas fluidized bed stirred media mill: design and performance of a prototype, 37
Granular flow
a rate dependent model for turbulent flows of dilute and dense two phase solid–liquid mixtures, 45
Granular mixtures
a quantitative image analysis method for characterizing mixtures of granular materials, 165
Granulation
on the modelling of granulation processes: a short note, 83
Grinding
change in surface properties of solids caused by grinding, 129
Group-C particles
fluidization of cryogels in a conical column, 179

Hydraulic conveying
pipeline friction losses of coarse sand slurries. Comparison with a design model, 9
slurry pipeline friction losses for coarse and high density industrial products, 19

Image analysis
a quantitative image analysis method for characterizing mixtures of granular materials, 165
Inclined bed
effect of inclination on liquid–solid fluidized beds, 101
Instrumentation
a new white light photosedimentometer for solid–liquid dispersion study: device description, stability and settling behaviour, 91
Iron particles
the mechanism of defluidization of iron particles in a fluidized bed, 231
Irregular particles
modelling of packing behaviour of irregularly shaped particles dispersed in a polymer matrix, 115

Lattice density
quasi-static compaction of porous propellant beds. I. Modeling ball powder experiments with deformed spheres in a regular lattice, 209
Lime
attrition and changes in particle size distribution of lime sorbents in a circulating fluidized bed absorber, 1
Liquid–solid fluidization
effect of inclination on liquid–solid fluidized beds, 101

Mathematical model
a predictive hydrodynamic model for circulating fluidized bed risers, 57
Mean particle size
on-line estimation of solids concentrations and mean particle size using a turbidimetry method, 157
Metal container
the tilting fluidized bed: a re-examination, 29
Microemulsions
production of ultrafine ZrO_2 and Y-doped ZrO_2 powders by solvent extraction from solutions of perchloric and nitric acid with tri-n-butyl phosphate in kerosene, 149
Mixture characterization
a quantitative image analysis method for characterizing mixtures of granular materials, 165
Modelling
on the modelling of granulation processes: a short note, 83
modelling of packing behaviour of irregularly shaped particles dispersed in a polymer matrix, 115
Models
pipeline friction losses of coarse sand slurries. Comparison with a design model, 9
slurry pipeline friction losses for coarse and high density industrial products, 19
Monte Carlo simulation
monte Carlo simulation of formation and reduction processes of ultrafine catalyst particles, 255

Operating conditions
a predictive hydrodynamic model for circulating fluidized bed risers, 57
Oxide particle
monte Carlo simulation of formation and reduction processes of ultrafine catalyst particles, 255

Packing
modelling of packing behaviour of irregularly shaped particles dispersed in a polymer matrix, 115
Particle circulation
effects of reduced air pressure on the particle circulation rate in two-dimensional vibrating particle beds, 133
Particle segregation
effect of inclination on liquid–solid fluidized beds, 101
Particle shape
measurement of anisotropic behavior of dry cohesive and cohesionless powders using a cubical triaxial tester, 197
quasi-static compaction of porous propellant beds. I. Modeling ball powder experiments with deformed spheres in a regular lattice, 209
Particle size
quasi-static compaction of porous propellant beds. I. Modeling ball powder experiments with deformed spheres in a regular lattice, 209
Performance
novel gas fluidized bed stirred media mill: design and performance of a prototype, 37
Photosedimentation
a new white light photosedimentometer for solid–liquid dispersion study: device description, stability and settling behaviour, 91
Porous bed
quasi-static compaction of porous propellant beds. I. Modeling ball powder experiments with deformed spheres in a regular lattice, 209
Powder characterization
analysis of a mixture of powders in gaseous fluidization by the method of defluidization and by fiber optic sensor, 139
Propellants
quasi-static compaction of porous propellant beds. II. Experiments and application of lattice compaction model to cannon propellants, 219

Quasi-static compaction
quasi-static compaction of porous propellant beds. II. Experiments and application of lattice compaction model to cannon propellants, 219

Random packing
quasi-static compaction of porous propellant beds. I. Modeling ball powder experiments with deformed spheres in a regular lattice, 209
Reduction
monte Carlo simulation of formation and reduction processes of ultrafine catalyst particles, 255
Rheology
modelling of packing behaviour of irregularly shaped particles dispersed in a polymer matrix, 115
Riser voidage
the volume-average voidage in the riser of a circulating fluidized bed, 79

Sampling process
a quantitative image analysis method for characterizing mixtures of granular materials, 165
Secondary fragmentation
simulation of secondary fragmentation during fluidized bed combustion of char particles, 71
Settling rate
a new white light photosedimentometer for solid–liquid dispersion study: device description, stability and settling behaviour, 91
Similitude
gas jets in fluidized media, turbulent diffusion flames, and condensing vapor jets in liquids, 187
Simulation
simulation of secondary fragmentation during fluidized bed combustion of char particles, 71
Slurries
pipeline friction losses of coarse sand slurries. Comparison with a design model, 9
slurry pipeline friction losses for coarse and high density industrial products, 19
Solidification
a quantitative image analysis method for characterizing mixtures of granular materials, 165
Solid–liquid phase
a rate dependent model for turbulent flows of dilute and dense two phase solid–liquid mixtures, 45
Solids concentration measurement
on-line estimation of solids concentrations and mean particle size using a turbidimetry method, 157
Solids distribution
the volume-average voidage in the riser of a circulating fluidized bed, 79
Solvent extraction
production of ultrafine ZrO_2 and Y-doped ZrO_2 powders by solvent extraction from solutions of perchloric and nitric acid with tri-n-butyl phosphate in kerosene, 149
Stirred media
novel gas fluidized bed stirred media mill: design and performance of a prototype, 37
Surface diffusion
the mechanism of defluidization of iron particles in a fluidized bed, 231
Surface enrichment
monte Carlo simulation of formation and reduction processes of ultrafine catalyst particles, 255
Surface properties
change in surface properties of solids caused by grinding, 129

Tilted fluidized bed
the tilting fluidized bed: a re-examination, 29
Triaxial compression tests
measurement of anisotropic behavior of dry cohesive and cohesionless powders using a cubical triaxial tester, 197
Turbidimeter
on-line estimation of solids concentrations and mean particle size using a turbidimetry method, 157
Turbidimetry
a new white light photosedimentometer for solid–liquid dispersion study: device description, stability and settling behaviour, 91
Turbulent diffusion flames
gas jets in fluidized media, turbulent diffusion flames, and condensing vapor jets in liquids, 187
Turbulent flow
a rate dependent model for turbulent flows of dilute and dense two phase solid–liquid mixtures, 45
Two phase mixture
a rate dependent model for turbulent flows of dilute and dense two phase solid–liquid mixtures, 45

Ultrafine powders
production of ultrafine ZrO_2 and Y-doped ZrO_2 powders by solvent extraction from solutions of perchloric and nitric acid with tri-n-butyl phosphate in kerosene, 149

Vibrating particle beds
effects of reduced air pressure on the particle circulation rate in two-dimensional vibrating particle beds, 133

Yield stress
quasi-static compaction of porous propellant beds. II. Experiments and application of lattice compaction model to cannon propellants, 219
Yttrium doped powders
production of ultrafine ZrO_2 and Y-doped ZrO_2 powders by solvent extraction from solutions of perchloric and nitric acid with tri-n-butyl phosphate in kerosene, 149

Zirconium oxide
production of ultrafine ZrO_2 and Y-doped ZrO_2 powders by solvent extraction from solutions of perchloric and nitric acid with tri-n-butyl phosphate in kerosene, 149
